Projects

EDTECH ECOMMERCE WEBSITE USING ASP.NET

03/2022 – 06/2022

Created an ecommerce website for an EdTech startup based out of Bangalore. The project was enabled using datamodels to manage courses, course categories, customer messages and newsletter subscriptions.

CINEMATOGRAPHY DRONE WITH AUTOMATED ABILITY FOR SELF-FLIGHT AND MANEUVERABILITY

08/2021 – 04/2022

Developed a ML enabled cinematography drone to tackle the gap in the market where good camera drones are unavailable at a lower price point with an added benefit of hands-free automated flight patterns to capture cinematic shots.

STUDENT ATTENDANCE DATA MANAGEMENT SOFTWARE ENABLED USING RFID

09/2018 – 03/2019

Developed a CMS software to manage the student information and enable automatic attendance tracking using RFID. This project was built specifically on the request of the SCAPS Team of Jain university, to reduce the time consumption of their employees doing tasks that can be automated.

SMART CITY USING IOT

06/2017 – 07/2017

Created a graphic virtualization of how an IOT can control the infrastructure of a city using Unity software in a Design Thinking Workshop and Hack-a-thon organised by IBM, GMASA and JUINCUBATOR.
